WORK EXPERIENCE

Senior Frontend Developer
DelGate Logistics / It's Here Delivery
Achievements/Tasks

Full-time
Vancouver, BC · Onsite
Jul 2026 - Present

- Introduced AI-agent engineering workflows with Figma and route validation plus responsive screenshot diffs to automate UI checks before merge.
- Led React, TypeScript, and Vite delivery from scaffold to production across warehouses, orders, customers, settings, and billing.
- Built reusable layouts, settings shells, and UI patterns; migrated key detail pages to reduce duplication and accelerate feature delivery.

Software Engineer
Betr Holdings, Inc.
Achievements/Tasks

Full-time
Miami, FL · Remote
2023 - 2025

- Built and launched React and React Native betting experiences for web, iOS, and Android, supporting 200,000+ active users.
- Integrated technology partners and third-party services; improved development workflows with GitHub Copilot.

Website <https://www.betr.app>

FansUnite Entertainment Inc.
Achievements/Tasks

Vancouver, BC · Acquired by Betr
2021 - 2023

- Built a React SaaS platform with white-label management and reporting, and a Next.js sportsbook for EU clients.
- Worked with product and design teams; contributed unit tests and investigated production support issues.

Website <https://www.fansunite.com>

Working stack: React, Next.js, TypeScript, TanStack Query, Zustand, GraphQL.

Frontend Developer
Spinndle Inc.
Achievements/Tasks

Full-time contract
Vancouver, BC · Remote
2020 - 2021

- Built React and Redux features for an e-learning SaaS platform with guided roadmaps and real-time check-ins.

Website <https://spinndle.com>

Working stack: React, Redux, JavaScript, Styled Components, Django.

Full Stack Developer
AssistList Association
Achievements/Tasks

Part-time contract
Vancouver, BC · Remote
2019 - 2020

- Helped launch a medical-equipment marketplace with React and Rails; reviewed code for quality and performance.

Website <https://www.assistlist.ca>

Working stack: React, Ruby on Rails, PostgreSQL, Docker.
