hello@francispham.ca francispham.ca /francispham23 /in/francisphamca Vancouver, British Columbia, Canada

WORK EXPERIENCE

Senior Frontend Developer Full-time
DelGate Logistics / It's Here Delivery Vancouver, BC · Onsite
Achievements/Tasks Jul 2026 - Present

- Introduced AI-agent engineering workflows with Figma and route validation plus responsive screenshot diffs to automate UI checks before merge.
- Led React, TypeScript, and Vite delivery from scaffold to production across warehouses, orders, customers, settings, and billing.
- Built reusable layouts, settings shells, and UI patterns; migrated key detail pages to reduce duplication and accelerate feature delivery.

Software Engineer Full-time
Betr Holdings, Inc. Miami, FL · Remote
Achievements/Tasks 2023 - 2025

- Built and launched React and React Native betting experiences for web, iOS, and Android, supporting 200,000+ active users.
- Integrated technology partners and third-party services; improved development workflows with GitHub Copilot.

Website <https://www.betr.app>

FansUnite Entertainment Inc. Vancouver, BC · Acquired by Betr
Achievements/Tasks 2021 - 2023

- Built a React SaaS platform with white-label management and reporting, and a Next.js sportsbook for EU clients.
- Worked with product and design teams; contributed unit tests and investigated production support issues.

Website <https://www.fansunite.com>

Working stack: React, Next.js, TypeScript, TanStack Query, Zustand, GraphQL.

Frontend Developer Full-time contract
Spinndle Inc. Vancouver, BC · Remote
Achievements/Tasks 2020 - 2021

- Built React and Redux features for an e-learning SaaS platform with guided roadmaps and real-time check-ins.

Website <https://spinndle.com>

Working stack: React, Redux, JavaScript, Styled Components, Django.

Full Stack Developer Part-time contract
AssistList Association Vancouver, BC · Remote
Achievements/Tasks 2019 - 2020

- Helped launch a medical-equipment marketplace with React and Rails; reviewed code for quality and performance.

Website <https://www.assistlist.ca>

Working stack: React, Ruby on Rails, PostgreSQL, Docker.
